This will represent the first two years of a proposed FY 1990-1994 multi-year procurement of a total of 300 aircraft. The APACHE is a twin-engine, two-place, fully integrated anti-armor weapon system capable of destroying tanks and other armored vehicles under day, night and adverse weather conditions. The aircraft employs the HELLPIRE anti-tank missile, Hydra 70 rockets, and 30mm gun. Target acquisition is accomplished by the Target Acquisition and Designation Sight (TADS) which enables extremely accurate fire with a high first round hit probability. Night navigation is provided by the Pilot Night Vision Sensor (PNVS). The mobility, flexibility, and rapid response of the AH-64 will provide the balance required to help counter the Warsaw Pact threat and allow the AH-64 to be a key member of the Rapid Deployment Force. The request also includes funding (\$12.3 million in FY 1990 and \$12.3 million in FY 1991) to procure 5 Combat Weapon Emergency Procedures Trainers in each of the biennial budget years.

BUDGET AUTHORITY			
Appropriation	2,791,500	2,871,788	+80,288
EXPLANATION:			

The reimbursable program (offsetting collections) increased by \$11,000 because of new Army National Guard orders.

Unobligated balances available at the start of the year were adjusted to reflect Congressional rescissions of \$14,800 in FY 1987 and \$30,000 in FY 1988.

The unobligated balance transferred to the accounts represents the net result of unobligate balance available from prior year (+\$44,800) and the reprogramming to prior year budget plan (-\$6,290). The reprogramming to prior year budget plans of \$6,290 represents an FY 1987 reprogramming pending approval.

EXPLANATION:

The reimbursable program (offsetting collection) decreased because orders from Foreign Military Sales did not materialize as anticipated. The reprogramming from/to prior year budget plans was adjusted as follows: FY 1986 OSD Classified reprogramming (-\$5,215), FY 1987 rescission in FY 1989 Appropriation Act (-\$14,800), FY 1987 SOF Modification reprogramming (+\$6,290) and the unobligated FY 1986 balance lapsing of -\$6,951.

The unobligated balance transferred to other accounts resulted from the FY 1986 OSD Classified reprogramming (\$5,215) approval in FY 1988 and the FY 1987 SOF modification (\$6,290) reprogramming carrying over into FY 1989.

The unobligated balance available to finance subsequent year budget plans resulted from FY 1989 Congressional rescissions to the FY 1987 of \$14,800 and FY 1988 of 30,000.

Flight Simulator Procurement Program

Exhibit P-43

1-39

FLIGHT SIMULATOR DATA SHEET
FY 1990/1991 Program

Simulator Model: AH-64 Combat Weapon Emergency Procedures Trainer

Aircraft System Supported: AH-64 APACHE

Description of Simulator: The Combat Weapon Emergency Procedures Trainer (CWEPT) consists of a full scale mock-up crew station for the pilot and copilot/gunner, electronically interconnected to both crew stations. This will provide the instructor a means to instruct and develop procedures as well as complete weaponization training for the aircrew. It is completely computerized to provide proper inputs. The CWEPT is capable of either providing automated training scenarios or allowing instructor/crew member interaction. The AH-64 CWEPT will enable AH-64 attack helicopter units to train pilots and copilots/gunners in cockpit procedures, weapon switchology, crew integration, and emergency procedures. Training on certain tasks and maneuvers is not possible in the aircraft because of the cost of ammunition and availability of laser ranges. Without the use of the CWEPT, AH-64 aircrews will have to train individual tasks in the Combat Mission Simulator (CMS) or the actual aircraft. This places an extra time restriction on both assets that could more effectively be transferred to the CWEPT. A cost avoidance will be realized in CWEPT versus CMS/Aircraft operating cost.

Development Status: Six production devices in addition to the prototype were planned in the Basis of Issue Plan. The production devices are similar to the prototype with all devices (visual systems and aircraft configuration) undergoing upgrades beginning in FY 1988 under a pre-planned product improvement program.

FLIGHT SIMULATOR DATA SHEET
FY 1990/1991 Program

Simulator Model: AH-64 Combat Mission Simulator

Aircraft System Supported: AH-64 APACHE

Description of Simulator: The prototype AH-64 Combat Mission Simulator will be designed to provide a training capability for flight and weapon delivery, normal and emergency procedures and sensor system operating tasks required in the operational design basis helicopter. The simulator will consist of pilot and copilot/gunner trainee modules, instructor modules, motion subsystems, visual subsystems and a computer complex. The pilot and copilot/gunner trainee modules will be replicas of the actual aircraft cockpits, and each will be mounted on a six degree freedom-of-motion base. The visual subsystem will approximate crew member video displays. Simulated imagery includes Forward Looking Infrared (FLIR), Day Television (DTV) and Direct View Optics (DVO). Pilot displays consist of the Integrated Helmet and Display Sight System Helmet Display Unit (IHADDS HDU) and a panel mounted Video Display Unit (VDU). Gunner displays include the IHADSS HDU, a target acquisition and designation sight Heads Down Display (HDD) and a TADS Heads Out Display (HOD). The simulator functions will be controlled from the instructor's station located behind each trainee module. The pilot and copilot/gunner will have the capability to train individually or may train as a team performing an integrated combat mission. One CMS will be procured in FY 1989.

Development Status: Development of the CMS was completed in FY 1988 at a cost of approximately \$84.0 million.
